## Why Heat With Biomass?

You can lower your heating bill while supporting farmers in your local economy. Shelled corn is renewable in just a few short months.

Heating with corn can cost as little as \$2 to \$6 a day! Corn is a clean-burning renewable energy resource. Burning corn emits carbon dioxide, not monoxide! Good for the environment and your pocketbook!

An average home will burn 85 to 150 bushels of corn a season, depending on the temperature, the size of the home, the insulation, and the placement of the unit. Typically, it takes 30 to 40 pounds of corn per day to heat a 1,500 square foot home. This is a heating cost of about \$1.64 per day!

Tax incentives are available for Agri-fuel and biomass appliances at state and federal levels. Visit [www.dsireusa.org](http://www.dsireusa.org) for more information on your area!

- 1 bushel of shelled corn = 5.0 gallons of LP gas
- 1 bushel of shelled corn = 3.4 gallons of fuel oil
- 1 bushel of shelled corn = 140 KWH of electricity
- 1 bushel of shelled corn = 4.75 CCF of natural gas

## About Magnum Stoves

- A Magnum Stove uses the same amount of electricity as a 100w light bulb.
- Magnum stoves draw in cool air from the floor which helps the heat from the heat exchanger to warm up the room more evenly.
- Locally made custom Hearth Boards meet and exceed the NYS Fire Code requirements and add an attractive accent to any room.
- The glass window in our Magnum Stoves provides a warm and relaxing view of a crackling fire.

## The MagnuM Countryside

---

The MagnuM Countryside stove series features easy-to-adjust heat and draft settings, thanks to its advanced electronic components. The model also features an exclusive ash drop system, ash drawer, and self-cleaning firepot.

## The MagnuM Baby Countryside

---

The MagnuM Baby Countryside model features a smaller size that doesn't sacrifice heating capacity. Hopper holds 50 lbs. of fuel to keep you warm for hours. This model also offers a battery backup option, allowing you to keep warm even if the power is out.

## The Magnum 6500 Furnace

---

With high-tech, tri-level combustion and no fly ash, I'm able to burn high ash and higher moisture corn. I provide efficient heat either connected to your existing ductwork or as a stand-alone furnace. Choose me for the cleanest burn in the industry.
