## RevolutionHeating.com

My wife and I would like to personally thank Rick and Laura Chapman of Revolution Heating for their service and dedication to us in the purchase of our Winchester and T-40 model stoves. Growing up with wood stoves was the way to go. But with our new stoves, less work and the same heat, there is no other choice. The oil tank is still full and the furnace doesn't come on at all. Our home is very comfortable. The T-40 is in the sun room and heats the entire house in the 70's, perfect. Our cellar stays 62 degrees year round with the furnace off but will use the Winchester to burn a little corn. I would highly recommend Rick and Laura for anyone looking to experience a "REVOLUTION (IN) HEATING" for sales, service and installation (JEFF and LUKE) for your heating needs. KITTENS also available with purchase.....

-- **Butch & Bonnie LaMay, New York**

We purchased a Countryside stove in Mid-January. After a couple months we figured out that we cut our fuel oil usage by 3 gallons/day and only using 1.5 bags of wood pellets. At the current price of oil it is an estimated savings of 4-5 dollars/day. Plus we are keeping sections of a our house a lot warmer than we were able to do before. With the way the prices of oil are going these days, it definitely was a great purchase.

-- **Dominic Gaurin, NY**

We are both in our seventies so didn't want to go back to wood with all its inherent problems. A new separate chimney, storage, and clean up. ...We were especially impressed that a pellet stove would fit almost anyplace in our home and didn't involve a separate chimney or special wiring. The pellets could be stored in a corner of our garage, a ton at a time, in forty pound bags, something I could manage. ...After making the decision to purchase a pellet stove, the delivery and installation was done in a very professional manner and in the time frame agreed upon. ...We love our pellet stove and its ease of operation. It is so clean. Loading the pellets is a breeze. So little clean up and no ashes to worry about. No unsightly oil drum, a very inconspicuous venting system and no odor. ...Thank you both so much. You helped us make a very wise decision. ...we look forward to a continued relationship.

-- **Bob & Muriel Robert, NY**

We have had our Magnum stove from Revolution Heating in Malone, NY for two seasons now. We're impressed by the efficiency - we barely touched our fuel oil at all (the oil company isn't really happy with us!). We highly recommend this heating system to anyone who wants to save some money. Rick and Laura are great to work with and provide the best service around.

--**T and M Howard, New York**

We just had our stove installed in October of 2007. We love it! It heats great and the flame is so relaxing to look at. We have saved already on fuel and would recommend it for anyone. We have a farm and dry our own corn, so we have really saved quite a bit. We rave about this stove to all our corn customers. We purchased our stove from Revolution Heating Products in Malone, NY and they have been really great to deal with and did a good job installing our stove.

I purchased a Magnum Baby Countryside From Revolution Heating Products In November of 2005. The service I received from this company was excellent. I would recommend burning corn to anyone in the north country. There are more btu's in corn than wood pellets. The "Baby" Countryside stove offers a very warm cozy atmosphere to any home. The savings on my fuel oil bill are also great.

-- **Tom Randall, New York**

We purchased our Baby Countryside from Revolution Heating Products in Malone, NY. We are very happy with the service we received when we had the system installed and all the questions that have arisen since. We have only had one small problem with our firepot that Mr. Chapman came out to our house immediately and fixed. When it is -30 degrees outside yet 65-70 inside(on only setting 2-3) we know we did something right. Although, I knew I wanted a corn stove I did not expect the expertise, quality workmanship and compassion that came from such professional owners. I would and have referred them many times.

-- **Andrea & Shawn, Chazy, New York**

The Chapmans at Revolution Heating Products are great people to deal with. We love the pellet stove. Highly recommend their business to others.

-- **Michael Heath, NEW YORK**

We purchased the Magnum Baby Countryside in 2006 from Revolution Heating, Malone, N.Y. Now we are entering our second year of heating our home with corn. The oil backup is for extreme below zero weather. The stove is dark green with an attractive base. It provides the comfort of wood heat without the mess of ashes, etc. It is environmentally friendly and puts the money in the hands of farmers instead of big oil. We also purchased the battery backup which got use last Thanksgiving-we were unaware our power was out as the transition was smooth. We erected a vinyl shed on a cement base for corn storage and have had no problems with rodents. The Chapmans provide prompt and excellent service.

-- **Bob and Sharon Regan, Potsdam, New York**

My baby countryside is such a gem. the warmth and comfort it provides is amazing. The savings in my fuel oil costs last winter was unbelievable. The service I have received from Revolution Heating has been superb.

-- **Deborah Fitzpatrick, Brainardsville, NY**

We have a full heating season behind us with our Baby Countryside. I'm very satisfied with its performance, and the service of our dealer in Malone NY. This is an excellent product with very dependable performance once you have some experience behind you. Dealer backup for new stove owners is key.

-- **Murray Beidler, Brushton, NY**

Our T40 was installed in December of the 2005 heating season by Revolution Heating Products in Malone, NY. The kitchen location not only made the kitchen cozy, but managed to warm the first floor and radiate warmth up to the second floor. The stove is easy to operate and wonderful to watch. The oil furnace didn't turn on except while we were in Florida - and we looked forward to returning to our cozy home! The service we received was, and still is, exceptional.

-- **Irene Dumas, NY**

We have just had our Magnum Countryside installed and we have used it a few times when it gets chilly. It is so nice, We can't wait to experience the savings that we are told we will reap. Everyone who has seen it are surprised at how beautiful and well built they are. We are definitely happy with our purchase. We are glad that it takes the money out of the oil companies hands and gives it to those who truly deserve it. The American Farmer! We hope that everyone will consider the purchase and all the benefits. We are happy with the service that Orrick and Laura Chapman have bestowed upon us, and encourage others to reach out and feel the warmth.

-- **Kris and Rebecca Provost, New York**

My husband and I purchased a pellet stove several years ago from Revolution Heating and have been very satisfied with our purchase. Recently, we were able to purchase and receive a ton of pellets although there seems to be a severe shortage at this time due to the recent rash of pellet stove purchases caused by the high price of other fuel sources. Our pellets were delivered to us very quickly and your attention to us was greatly appreciated. Thank You.

-- **Dennis and Mary Lou McCaffrey, North Bangor, NY**

My wife and I purchased our Magnum Winchester before the start of the 2008 heating season. We had just bought our first house the year before and were floored on the amount of money we spent on fuel oil. With a new baby in the house it is very important to keep our house nice & toasty warm. Well our new pellet stove has done just that and more. We have already saved money and will continue to save money. We cant believe the amount of heat the stove puts out!! This stove has fulfilled our expectations and surpassed them. And the customer service we have received has been great, the gentlemen that installed it were quick, efficient and professional. They showed us how to operated our stove and answered any question we had. Having never owned or operated a pellet stove myself i was full of questions, Laura & Rick answered all of them. I would highly recommend Revolution Heating products for all your pellet stove needs.

-- **Matt Maneely**

Just want to say the Countryside stove keeps us warm even in our big old drafty house!!! It's our primary source of heat all winter, and it even LOOKS nice in our central Family Room. I miss the fireplace from my childhood home, and being able to see the flames warms me inside as well as out. The Countryside paid for itself in savings the first year, and continues to keep our heating costs down. It has it all...lower cost heating, ambiance, and ease of use!! Thanks for your service...

-- **Holly Harz**

My wife & I have been talking about the rising cost of fuel prices this year and how it was going to affect us this year. While walking at the Franklin County Fair Patty & I came upon Rick & Laura Chapmans booth (REVOLUTION HEATING PRODUCTS). We had a lot of questions & concerns and Laura was very eager to help us. It didn't take us very long to decide that the WINCHESTER pellet stove was going to be heating our home this winter. The size of the stove is perfect and it heats both floors of our home. We like to see the flame that the stove shows while burning. Our animals love the heat ( so does PATTY). The pellet stove doesn't bother my wifes asthma like a wood stove would. No wood to cut. No expensive chimney to buy. The cost of the pellets is very affordable compared to the cost of fuel oil and it doesn't take any time to clean & load the pellet stove. I also like the idea that we will not be going broke trying to heat our home this year and the years to come. Our new pellet stove should pay for itself within the 1st year of its use. I like the fact that I can drive locally and talk face to face with a local business and get answers to my questions . That means a lot to Patty & I. Thanks to RICK & LAURA CHAPMAN (REVOLUTION HEATING PRODUCTS) for making our winter more enjoyable this year.

-- **TONY & PATTY CLARK, Malone, NY**

I would like to thank Rick and Laura Chapman at R.H.P. for the wonderful service and fine products they provide and sell at their store. Although I did not purchase my pellet/corn stove from them I do purchase my fuels for it from them. They always seem to have the right answer when I do have a problem with my older stove. This season is the start of my fourth winter with this stove so I have bought fuels from a few distributors all over the area. R.H.P. always seemed to have the best quality fuel in the area and at the best prices. Best of all they always had the amount that I needed. Last January I injured my back and Laura even loaded the bags on my truck for me. Their store has that old fashion kind of we care attitude that brings great credit to them and our whole community. Since installing the pellet stove my fuel usage has dropped from two and a half tanks to one per season. I am currently thinking of putting a second stove in to stop fuel use all together. Any chance I get to put it to the Malone Fuel Mafia makes me happy. I also hear as last year they are running a special on Kittens Take one for free Get a second for free also. Thanks Laura and Rick keep up the great work.

-- **Larry & Karen Bouissey, Constable, NY**

We bought our Essex pellet stove in January of 2005 and I must say it is the best investment we could have made. This stove has a battery backup connection in the event of a power failure. We love this stove, it provides comfortable heat and with little maintenance. Rick & Laura are great to deal with. And the service is fantastic. Thank you very much Rick & Laura.

**--Bob Reil, Malone**

We purchased the Winchester and had it installed in September to replace our wood stove. Where my husband sits for supper it is now too hot for him to sit there, we placed it the same spot as the wood stove. We are getting great heat and love the convenience of just filling it once for the day...We have enjoyed working with Rick and Laura and have told many friends and family about the stove. It was a good choice to install the pellet stove and look forward to using it this winter.

**--Leonard and Donna Bowen, Fort Covington, NY**

I purchased my Magnum Countryside last year to heat my 1800 square foot farm house. I was able to heat my entire home this past season for \$680 bucks. I saved over \$1300 in my normal fuel oil bill!! American Energy Systems produces the best quality stoves I've seen on the market today! That's why I made the choice to purchase the countryside. More homes in America should heat with corn stoves to support our country's farmers and cut dependency from foreign oil companies.

**-- Scott A. Thurber, New York**
